Clearer Images under Adverse Conditions

Taking images under adverse conditions such as haze or fog can be frustrating.

IPR’s ghost removal technology can effectively synthesize an image under various lighting conditions without ghosting artifacts and our haze removal technology can significantly improve the visibility of the scene and corrects the colour shift. Hence effectively produce a sharper image.

Features

- Automated haze removal
- No halo artifacts
- Reveal hidden objects
- For any haze level
- Ghost removal: no ghosting artifacts
- Mobile and desktop app available
- SDK is available
Clearer Images under Adverse Conditions

### Applications

- Digital cameras
  - Mobile phones
  - DSLR
  - Prosumer
- Landscaping
- Satellite imaging
- Underwater imaging
- Security imaging

### Benefits

- Clear and artifact-free imaging
- Short processing time: 10X faster than commercial applications
